Main Features

Patch Manager : Add lighting fixtures in a few seconds

Stand Alone Mode : Download your shows into the interface memory, trigger sequences from the interface I/O ports, and read the current sequence from the numeric display. This mode also serves as a backup in case of a computer crash, or as a full controller in architectural applications

Effects Generator : From simple movements, to complex RGB effects, or playing video on an RGB Matrix; creating advanced effects is a breeze

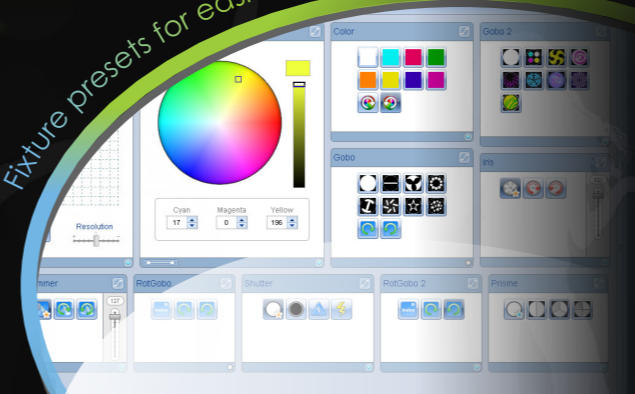

Profile Editor : Introducing a new format including the very latest features available on DMX devices, the new Virtual Fixture Profile Editor makes it possible to create your own devices quickly and easily

3D Visualization : Utilizing the latest 3D rendering technologies and the new fixture profile format, the new 3D visualizer offers unprecedented realism and quality
